

**Bug summary:**

App stoped working when trying to delete a token

---

**Observed Behavior (a description of what happened with the app):**

The app quitted unexpectedly when I try to delete a token

---

**Expected Behavior (a description of what you expected to happen):**

Delete the token I selected

---

**Steps to Reproduce (the steps to reproduce the problem):**

1. click the three dots at the top right corner and then click Add token
  2. enter the name of the token, and click next
  3. choose generate random seed, and click complete
  4. click the three dots at the top right corner and then click Delete Token
  5. choose the token I just created, and click ok
