

Bug summary:

Application has stopped

Observed Behavior (a description of what happened with the app):

I added a new task. Pressed the show times button. Then I want to add a new time range. But the application stopped working.

Expected Behavior (a description of what you expected to happen):

I expected to add a new time range. I thought after pressing the add a new time range button it should give me a text box to insert a time range.

Steps to Reproduce (the steps to reproduce the problem):

1. Add a new task
 2. Press show times of the task
 3. Try to add a new time range
-
