

Bug summary:

The AntennaPod app failed to produce any search results when the "mis" keyword is inputted in the iTunes search bar.

Observed Behavior (a description of what happened with the app):

The app operated as expected while navigating to the Add Podcast page. Upon selecting the 'search iTunes' button, and inputting the word "mis" into the search bar, the following message appears: or..json.JSONException: No value for feedUrl

Expected Behavior (a description of what you expected to happen):

when inputting the word "mis" into the search bar, podcasts that include mis in the title or description should appear.

Steps to Reproduce (the steps to reproduce the problem):

1. Select the button the left of the word Queue on the top left of the screen
 2. Select the "Add Podcast" button from the menu
 3. Select the "search iTunes" button
 4. Input the keyword "mis" into the search bar and hit enter
