Bug summary:

It did not generate the token. Looked like what it was on the incorrect video.

Observed Behavior (a description of what happened with the app):

I put in "qin" in the blank, and followed what the video did, pressed next, and chose the second option. And pressed complete. But it says no token defined.

Expected Behavior (a description of what you expected to happen):

I think according to the correct behavior video. I should see a token generated

---

Steps to Reproduce (the steps to reproduce the problem):

1. Go on the app in my browser

2. Put in "qin" and press next

3. select the second choice and press complete.
