Bug summary:

Application crashes

Observed Behavior (a description of what happened with the app):

Application crashes on adding a new time range.

Expected Behavior (a description of what you expected to happen):

A new time range should be added.

Steps to Reproduce (the steps to reproduce the problem):

1. Add task along with task name

2. Long press it and open show timings

3. Click on 3 dots on the top right screen and select Add a new time range
